

COMPANY POLICY

Our market segment (4.3)		
<u><i>Design and construction of high pressure die casting moulds through mechanical machining and electro-discharge machining processes and thermal treatments.</i></u>		
Requirements of all involved parties, both internal and external to the company		
COMPANY	CUSTOMER	EMPLOYEES
Sustainable growth	Product lifetime	Work safety
To become reference supplier	Costs	Work continuity
Economic profits	Delivery time	Satisfaction

Form s.r.l., a specialized die design and construction company, considers the creation of a strategic plan oriented to the continuous improving of the company performances in terms of quality, environment respect and occupational safety crucial in order to satisfy entirely the customer’s needs, the environmental improvement expectations, the occupational safety and the quality connected with the market segment where it operates. Therefore, Form srl has integrated at the Quality Management System, that was already present since 1996 and up-to-date with the most recent certification UNI EN ISO 9001:2015, the Healthy and Occupational safety Management System (rule: UNI ISO 45001:2018). Form also adopts an effective environmental management system.

Company Form s.r.l. considers necessary for its strategy to produce Die Casting molds and components that meet the following expectations:

- Have a long lifetime in order to make the purchasing advantageous, compared to other types of molds (for gravity/low pressure/prototypes/ etc...);
- They are efficient/easy to maintain for the foundry and have as much interchangeable parts as possible and can be adapted to existing foundry equipment;
- Limit the environmental impact during the casting process;
- Are used in plants that take into account workers’ safety and health.

Form s.r.l. also constantly strives to improve the products and the management systems by defining short-term and medium-term improvement plans to set macro goals and annual plans to engrave and commits to compliance with all binding requirements.

Therefore, on the accident prevention and occupational disease field, FORM arranges:

- Task and equipment operative instructions, which are periodically checked and up to date;
- DPI’s management and distribution procedure and check on its proper use;
- Periodical machineries and equipments’s maintenance;
- Collection system for the “almost incidents” and continuous check and improvement of the system;
- An annual training, informational and educational plan that expects continuous and specific interventions, if necessary;
- Periodical meetings between chief, RSPP and RLS, which are not lower than 3.
- A system fulfils legal requirements and other requirements;
- Safe and healthy working conditions for the prevention of work-related injury and ill health;
- Evaluation system to eliminate hazards and reduce OH&S risks.

For the delivery times, the costs and the quality of products, Form realizes:

- Forms and procedures of the continuous quality check system product;
- Periodical maintenance of machineries and equipments;
- Careful planning of orders in all the productive phases and continuous synergy between the departments;
- Annual arrangement of the budget and regular check on the exceeds;
- An annual training, informational and educational plan that expects continuous and specific interventions, if necessary;

Form s.r.l also maintains a constant commitment to the environment:

- An effective and efficient waste's management, that encourages the recycling and reduces the waste's production;
- Reduction of the Energy consumption putting attention on the purchase phase and by considering less energetic impact of machineries or equipments and incentivize the reduction of any system;
- To make aware for buying biological products, which are used on the productive department;
- To prevent any kind of pollution keeping the emission of the smoke on the atmosphere in compliance with the levels provided by law (chimneys and heating system) and remove dangerous gas on the company;
- An annual training, informational and educational plan the expects continuous and specific interventions, if necessary;

The General Administration applies itself, throughout periodically re-examination of all the risks and the opportunities in order to adjust the suitability of the company policy and to guarantee a continuous and coherent improvement on the Quality, Environmental and Security management.

The Policy is communicated internally with bulletin boards and regular meetings. The integrated policy is published on the website in order to involve all the interested person (employees, supplier, custode, collaborator ecc..) on the goal's achievement.
